

The logo for 'enviro' features the word in a dark blue, lowercase, sans-serif font. A green leaf-like shape is positioned above the 'e', and a green circle is centered within the 'o'.

enviro

Enviro's three decade-long journey has been a saga of providing wide-ranging solutions to the ever-growing problems of environmental degradation and providing sustainable engineering solutions.

We have recently re-engineered our logo to represent this paradigm.

In the spirit of implicitly adding value to the various project sectors that we are associated with, our new logo puts an emphasis on the letters 'en', to create a connect to the words 'en'lighten, 'en'rich and 'en'hance.

At the same time, we have retained the essence of our original logo, which depicted a leaf and sphere in Green to symbolize our continued commitment to the environment. We have also continued to retain Blue as the primary colour as, being the colour of the sky and sea, it is associated with depth and stability and symbolises trust, loyalty, wisdom, confidence, intelligence, faith and truth.

# PEOPLE STEERING THE VENTURE

## MR. H.K. DESAI

### FOUNDER AND MANAGING DIRECTOR, ENVIRO GROUP

Enviro Group is led by its Founder and Managing Director, Mr. H. K. Desai, a visionary entrepreneur with over 35 years' of experience in the field of environmental engineering and consultancy projects. During this tenure, he has been addressing wide ranging techno-economical solutions to the ever-growing problems of environmental degradation. He has taken a lead role in accreditation and certification of Organisation and Laboratory. Mr. Desai has single-handedly steered the company to become one of the most trusted environmental consultants in India. Today, his passion for successful mitigation of environmental issues remains as fiery as ever, as he drives the company towards scaling newer and greater heights.

## **ROHAN DESAI**

**B.E. IN CHEMICAL ENGINEERING**

**MASTERS OF SCIENCE IN WATER AND WASTE WATER ENGINEERING**

Rohan has been an integral part of the company since 2011. Overseeing the Projects Department, he spearheads the business activities related to water, waste and solid waste solutions that fall under his stewardship at Enviro Watertech Engineers, as its CEO. Rohan is an Enviro Group management representative for NABET and IMS. With a proficient and experienced team that hails from civil, chemical, mechanical and environmental engineering backgrounds, he has been responsible for the successful execution of approx. 80-100 projects so far. His areas of focus are wastewater treatment plants, zero liquid discharge, solid waste, solar and rainwater harvesting - consultancy services as well as actual onsite execution. He has experience across the multiple domains which Enviro Group operates in.

## **SAURABH DESAI**

**BACHELOR OF TECHNOLOGY IN CIVIL ENGINEERING**

**M.E. IN ENVIRONMENTAL ENGINEERING**

**POST GRADUATE PROGRAM IN FAMILY MANAGED BUSINESS**

Saurabh is a NABET-certified functional area associate in the air and water pollution domains and has been involved in Effluent Treatment projects, from design to commissioning. He is passionate about sustainable development and has worked on multiple Environmental Impact Assessment projects. He is also the Lab-incharge for Enviro Group Laboratory and looks into the quality control and process improvement of the company. Leveraging his dual background in Management and Civil and Environmental Engineering, along with relevant certification and project experience he has garnered along the way, he adds immense value to all verticals of the Group, from enhancing the sustainability quotient of projects to business development.

## **RUTUJA GAMEY DESAI**

**BACHELOR IN ARCHITECTURE**

**POST GRADUATE DIPLOMA IN PROJECT MANAGEMENT**

Rutuja is a vital part of the environment clearance division of the firm and is involved in impact assessment studies for Area Development Projects and the Construction Industry. She is wellversed with enviro-legal issues, rules and regulations of DCR and NBC standards. Rutuja is a NABET-certified functional area associate in the domain of land use. She effectively handles all the expert appraisal committee meetings and assists in client interactions for Environmental Clearance for Real Estate projects. She has previously worked with the likes of Shashi Prabhu and Associates and the Kalpataru Group, a leading real estate developer in India. Being an Architect by training, with hands on experience in the domain, Rutuja has a deep understanding of sustainability.

# UNIQUE POSITIONING

Enviro Group provides the entire range of environmental solutions under one roof, right from government liaison to design, construction, erection, commissioning of the turnkey projects. In addition, we undertake operation and maintenance

Today, Enviro Group is well positioned in a segment that has entry barriers in the form of accreditations, research infrastructure requirements, such as laboratories, technology and equipment. It has earned the reputation for being the first-choice provider for hassle-free and impeccably delivered end to- end consultancy and engineering solutions.

## CORE VALUES

To be the final authority on legal and compliance issues related to the Group's activities.

To be socially responsible for prevention of pollution and environmental protection, occupational health, safety and quality in all our environmental surveys, studies, projects, monitoring and testing.

To provide quality products and services to our customers on time through continual improvement to enhance consumer.

To engage competent professionals, duly approved by the regulatory or competent authorities.

To strive for excellence in all our activities through continuous improvement in systems and employee development.

To provide a comprehensive framework for monitoring our performance and progress against objectives and targets.

# CONSULTANCY SERVICES AND CERTIFICATION

We also offer consultancy services and certifications on the strength of our accreditation and laboratory facilities. These services include:

Regulatory guidance in the field of Pollution Control

Assisting Clients in obtaining Environmental Clearance from Department of Environment (Central/State Government)

Assisting Clients to obtain Consents (Establish, Operate, Renewal & Amendment) for industries and infrastructure projects

Detailed Engineering of Pollution Control Plants

Assisting Clients to obtain various NOC/ Approvals like municipal Civil Aviation, Fire, Water, Sewer, Drainage, Sewerage/Effluent Discharge Permission, Tree & DGCA etc.

## EAEPL

Environmental Clearance  
for Various Sectors as per  
NABET scheme

Coastal Regulation  
Zone (CRZ)

High rise  
Clearance

CGWA NOC

Wildlife  
Clearances

Consent  
Management

NOC's/Clearances for  
Sewer, Water, Storm  
Water Drain,  
CFO, Aviation, Tree, etc.

Post Clearance  
Compliance Report

Environment  
Audits (Form V)

No Increase in Pollution  
Load Certification

Environmental Due  
Diligence  
(Phase 1 & 2)

## ASSESSMENT AND STUDIES

- Environmental Impact Assessment (EIA) for environmental clearances, coastal regulation zone etc.
- Environment Management Plan (EMP)
- Solid Waste Management – Recycle and Disposal Planning
- Socio Economic Impact Assessment
- Environmental Clearance Compliance
- Baseline Monitoring and Analysis
- Air, Water, Soil and Noise Monitoring and Analysis through NABL Approved and MoEF & CC Recognised Laboratory.

# LABORATORY SERVICES

Our Accreditation and Research Infrastructure include government-accredited in-house laboratory (recognised by Ministry of Environment, Forests & Climate Change under GSR No. 497 dtd. 01.05.14), Well equipped workshops and mobile laboratory services which are manned by qualified and experienced professionals. All these enable us to offer our clients the best quality services.

- Treatability Studies of Waste Effluents

---

- Water Analysis  
(Municipal, River, Borewell etc.)

---

- Wastewater Analysis

---

- Microbial Testing

---

- Heavy Metal Testing

---

- Bioassay Tests

---

- Stack Monitoring

---

- Ambient Air Monitoring

---

- Noise Monitoring

---

- Soil Analysis

---

- Baseline Studies for EIA Reports

# SUSTAINABLE SOLUTIONS

We offer a complete array of Green Building engineering consultancy services and design certification for IGBC, LEED and GRIHA rating systems.

**We also provide complete document preparation and submission for sustainable solutions such as:**

- MEP Design Consultancy
- Building Information Modelling (BIM)
- Building Simulations
- Daylight and Ventilation Analysis
- Environmental Planning
- Sustainable Design Solutions for Building Envelope
- Building Commissioning and Third-party Audits
- EHS manual for site implementation and execution

Our services are available for all types of projects, such as Residential Complexes, IT Parks, Hotels, Commercial Offices, Institutes, Government Buildings, SEZs, Townships, Factories, Office Interiors, etc.

**“Completed more than 200 Green Building rated projects and 300+ Green Building projects are in the making...”**

## **Energy Conservation Building Code:**

Enviro group provide complete consultancy services for **HRC Clearance and ECBC compliances. We truly believe that** Green Building Certification is the best way to demonstrate the impact of design efforts and initiatives towards crafting a project which is truly “green”. Green Certifications are available for all new constructions, viz. Residential, Commercial Offices, Institutes, Government Buildings, Factories and Existing Buildings & Landscapes.

The purpose of the Energy Conservation Building Code (ECBC) is to provide minimum requirements for the energy efficient design and construction of buildings. Enviro group has an efficient in-house team for conducting the ECBC Reporting.

# LIVING OUR BELIEF

For the Enviro Group, CSR is a mindset and a way of life. It is the very basis of our entire business proposition. We have chosen a profession which necessarily involves protection of the environment by upholding the laws of the land. However, our intent goes far beyond; it gives us satisfaction to ensure that these laws are followed in spirit, not just in letter.

Without drawing a distinct line between our professional and CSR activities, we have spearheaded numerous tree plantation drives, implemented drinking water treatment and undertaken various other actions that ensure sustainability of the environment.

It is our belief that we are an inseparable part of our ecosystem and any man-made damage that is done to the environment is effectively done to the perpetrator of that damage too. We spread this message to those we interact with towards ensuring a more sustainable tomorrow.
